<tr>
<td><strong>Introduction</strong> - How to navigate, update data and fix errors in Pedigree Wizard</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>A</strong> Navigate</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>A1</strong> To select an individual sheep record, click on &quot;Breeding &amp; Pedigree Display&quot; on the home page.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>A2</strong> The unique 16 digit ID is displayed for each sheep (blue), with the sire (red) and dam (green). On the &quot;Breeding&quot; page, basic information is displayed with further information on this sheep displayed by clicking on the buttons (eg. Lamb, Adult, Wool etc.)</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>A3</strong> There are a number of ways to move to a different sheep. Use &quot;Prev&quot; or &quot;Next&quot; to move to a sheep above or below the one currently displayed. Click on &quot;Picklist&quot; to type in the ID of the sheep required. Press the &quot;Page Up&quot; and &quot;Page Down&quot; keys on your keyboard (be careful what field your curser is in as these keys can change values - ensure the curser is in the comments field if using these keys). Click on the &quot;Quick Locate&quot; icon at the top right of the screen.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### A4

"Quick locate", generates a list to select from. Use the scroll bar or click on the required sheep to select it. This list may also be filtered by typing in numbers in the "Filter for" field at the bottom. When you have selected the desired sheep press "Esc" on your keyboard or click elsewhere in the display screen to remove the list.

### A5

Click on the "History" tab in Breeding and Pedigree Display. Breeding History for the sheep displayed and its Sire and Dam are available here. For example, click on the "Breeding History" for the "Dam".

### A6

An Alert box will ask if you wish to include the daughters of the Dam. Click on "Yes".

### A7

A printable list will appear of the progeny of that Dam. (This is useful when classing ewes.)

### B

**Update and Fix**

### B1

Validation errors may occur with the ID number of a sheep. In this example the year of birth is inconsistent, 2501232009080657 (the last 6 digits should be 090657). To fix this error click on "Retag".
B2 The "New Id" number can be changed (click in the number and delete and retype or overtype it) to 2501232009090657. Click on "OK". This is also useful when a sheep can be identified but needs to be retagged.

B3 If the Birth Group is incorrect (in this example the lamb is a single but the birth group is twins), it can be fixed by clicking on "Change Group".

B4 From the Pick List select the correct Birth Group and click on "OK".

B5 If a Sire has been incorrectly selected, click on "Change Sire".

B6 From the Pick List, click on the correct Sire and click on "OK".
It is important to note that if an animal is to be "subgrouped" at a later stage, this is recorded on the "Lamb" page on the right hand side. The original (birth) group will always remain the same.

All information and data that has been input into PW can be amended or updated in "Breeding & Pedigree Display. Some information can only be input in PW in these pages (for example "Foster Ewe ID number", some wool and visual data). It is useful to update the "Status" of every sheep so that a "current" list of animals is able to be retrieved at any time. It is also handy to have a record of what happened to each lamb when assessing the performance of Sires and Dams. The "comments" field can be used to record these notes.

A sheep record may need to be deleted (for example demonstration sheep after your own sheep have been entered). Once a record has been deleted it cannot be resurrected. If a record has been deleted in error all information will have to be reinput. To delete a record, click on "Delete".

A confirmation box will appear before deletion. Do not click on "OK" unless you are certain you wish to delete this record.
