Marketing with ASBV Logos

As a ram breeder involved in LAMBPLAN or MERINOSELECT the use of the relevant ASBV logo is essential in the promotion of your business. The ASBV logo indicates your participation in genetic evaluation backed by strong quality assurance procedures. A buyer can be confident of selecting objectively measured animals based on genetic merit.

The use of the LAMBPLAN or MERINOSELECT ASBV logo in your marketing materials indicates that you are performance recording and allowing buyers to select the best possible animals for their individual breeding programs.

When an ASBV logo is displayed the following can be certain:
- Animals are reported with ASBVs and can be compared across flock
- Meet minimum standards for across flock linkage
- Meet minimum standards for quality assurance
- Meet minimum standards for trait accuracy
- Have released accuracy information

The ASBV logos can be displayed in many situations - anywhere you mention details of your performance recorded animals that meet the requirements to receive ASBVs.
Examples include:
- Sale catalogues
- Pen cards—see example to right
- Websites
- Brochures
- Newsletters
- Advertisements

Tips for using the logos:
- Use the logos as jpeg files at 300dpi for best resolution and printing quality
- Do not alter the logos in anyway as it will reduce their quality i.e. stretch them, change their colour
- Make sure that when reproducing the logos the following colours are used:
  - PMS: Blue PMS 661
  - CYMK: Blue C100  M72  Y0  K6 and Black R0  G0  B0
  - RGB: Blue R0  G64  B134 and Black R0  G0  B0
- Try to keep logos to a standard size, the provided logos can be resized to suit your needs

Please contact the office to request and electronic copy of the logos to use in your marketing material.
